Kennedy Center Partners in Education

Are you looking for ways to connect students to the curriculum, to each other, and to the arts? If so, then you do not want to miss these evidence-based workshops that provide the tools to creatively engage students. During the 2022–23 school year, you will have the opportunity to work with national teaching artists to learn arts-integration strategies.

Arts integration is an approach to teaching in which students construct and demonstrate understanding through an art form. Students engage in a creative process that connects an art form and another subject area and meets evolving objectives in both.

To register for these workshops, check your district's learning portal or contact your district fine arts coordinator to register and receive professional development credits.

These opportunities are open to Scottsdale and Paradise Valley Unified School District teachers only.

Land Acknowledgement

We should take a moment to acknowledge the land on which we gather. We are on the unceded and unsundered Indigenous homelands. We acknowledge the ancestors of the First Nations peoples of modern-day Arizona. The makeup of our current state is entirely shaped by these ancestors. In fact, the name "Arizona" comes from the word for "little spring" in the O'odham language.

We also invest in the future of contemporary tribal members. As an arts and culture organization, it is our duty to uplift the artists and activists doing the work. We have been honored to have many visual artists and performers, representing numerous tribes, take part in Scottsdale Arts events and exhibitions through the years.
